Default Visual Studio navigation
Navigation is carried out by Visual Studio. ReSharper navigation to external sources is disabled.
Navigation to Object Browser
By default ReSharper navigates to Object Browser.
Navigation to Assembly Explorer
By default ReSharper navigates to Assembly Explorer.
Navigation to Sources
By default ReSharper navigates to Metadata View or decompiled code, or sources from symbol files depending on the settings defined below.

☑ Use sources from symbol files when available
☑ Allow downloading from remote locations
☑ Decompile methods
Advanced...

☑ Use Assembly Explorer instead of Object Browser by default
☐ Show non-public compiled items in 'Go To ...' results
